

Curriculum for the Growth/Lactation/Reproductive Physiology Area of Concentration

The courses listed below are those typically taken by students enrolled in the specified areas of concentration, and are provided to help guide you in planning your curriculum. Ultimately, the classes you select will be chosen through discussions with your major advisor and doctoral advisory committee, and subsequently listed on your Plan of Study. These courses may be deemed unnecessary due to previous training at other institutions.

Required Courses:

ANSC 360	Graduate Presentation Skills
ANSC 397	Animal Science Seminar (twice)
GRAD 395	Thesis Research

Strongly Recommended Courses (or their equivalent):

MCB 301.	Biochemistry
PLSC 350	Statistics

Recommended Courses:

NUSC 313	Nutrition and Gene Expression
ANSC 344	Growth and Metabolism of Domestic Animals
ANSC 322	Physiology of Lactation

Participating Faculty: Drs. Zinn, Milvae, Riesen, Hoagland, Kazmer, Darre
